

Provantis 7™ is a modern, fully integrated Windows-based solution, which enables data to be shared across all the disciplines of a toxicology laboratory. It addresses all the needs of the toxicology laboratory from compound receipt through to final report production.

- General Toxicology
- Reproductive Toxicology
- Pathology
- Clinical Pathology
- Dispense
- Protocol & Report Assembly
- Tables & Statistics
- Toxicology Resource Planning
- Labeling
- Genetic Toxicology

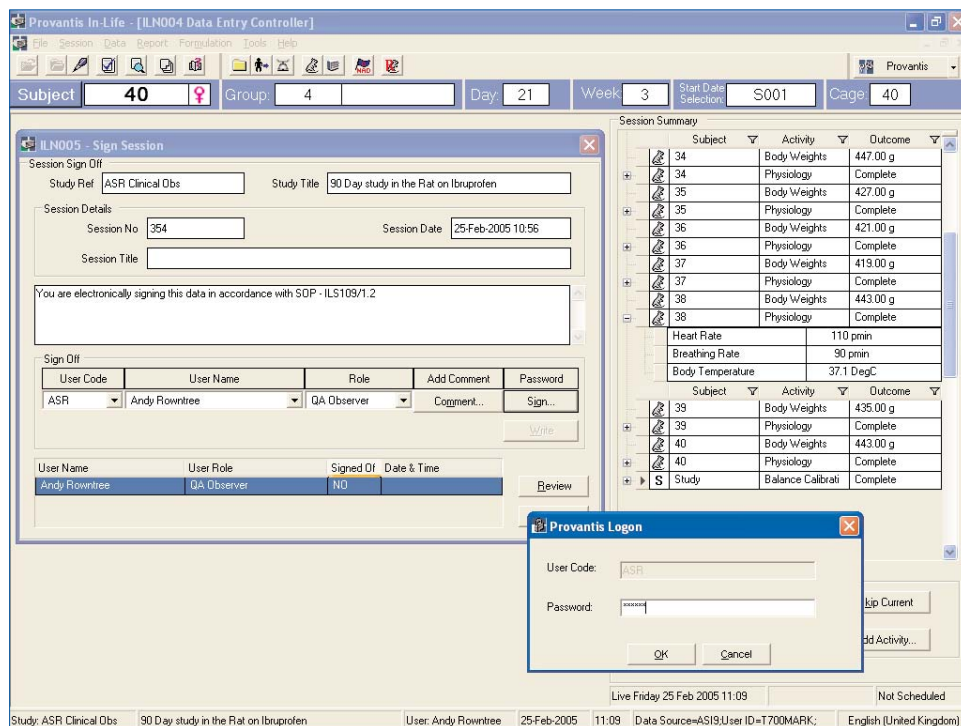

Provantis 7™ is one of the largest projects in Instem's history, drawing on the wealth of

technical skills and knowledge from staff across its sites in Europe and North America.

The advanced flexibility of Provantis 7™ means that it is ideal for multi-national corporations and smaller organizations, CRO's, academia and commercial enterprises carrying out regulated and unregulated investigations.

Provantis™ has long been recognized as the premier software system for companies engaged in non-clinical evaluation studies. The market leader in its field, Provantis™ is used by the world's leading Research & Development organizations in the collection, secure storage and dissemination of mission critical information during product development activities.

Provantis 7™ brings cutting-edge functionality and exciting product enhancements, underpinned by Instem's extensive support and services capability.

e-signing a session

Provantis 7™ features:
